

**Transport Planning Associates** is a company of consulting transport planners, traffic engineers and infrastructure designers with offices in Bristol, Cambridge, London, Oxford, and Welwyn Garden City.

Our core business is to provide consultancy services to private and public sector organisations on the transport infrastructure and services issues arising from the development of land for a variety of uses, and to advise on strategic transport planning, sustainable travel planning, and the design and specification of new and improved transport infrastructure.

We undertake all transport planning, traffic engineering and infrastructure design aspects from initial assessment to the presentation of expert evidence at public inquiry, and to subsequent implementation.

***Our Vision is:***

***To become and remain a best-in-class consultancy, to gain the respect of the communities and project teams within which we work, to create a working environment that attracts the most talented professionals, and to be our clients' consultant of choice.***

We understand that our success is built on the achievements of our past and present employees, on the ambition to achieve our *Vision*, and to live up to the values that define the culture of our business.

We endeavour to achieve our *Vision* by providing our people with an attractive place to work, and by building long-standing relationships with our clients. We do that by providing high-quality cost-effective consultancy services that encourage our people to realise their potential and that help our clients achieve their objectives. We work hard to exceed expectations.

Clients are the focus of our business, and we work closely with their multi-disciplinary project teams to deliver innovative and cost-effective solutions with skill, integrity and professionalism.
